## Administration MySQL Error

Posted by kherrera3 - 2007/06/08 00:50

---

I installed the component, finished the installation (clean install), and installed the sample data. I get this error when I try to access the "Forum Administration" page:

DB function failed with error number 1054

```
Unknown column 'g.group_id' in 'on clause' SQL=SELECT a.*, a.name AS category, u.name AS editor, g.name AS groupname, h.name AS admingroup FROM jos_fb_categories AS a LEFT JOIN jos_users AS u ON u.id = a.checked_out LEFT JOIN jos_core_acl_aro_groups AS g ON g.group_id = a.pub_access LEFT JOIN jos_core_acl_aro_groups AS h ON h.group_id = a.admin_access GROUP BY a.id ORDER BY a.ordering, a.name
```

Did I miss something?

Joomla 1.5 Beta 2

Fireboard 1.0.1

---

Please make sure you are running 1.5 in compatibility mode. Also Fireboard will not fully support 1.5 until this fall.

joomla 1.5 beta 2

fireboard 1.0.1 beta  
install clean complete.

:sick: I recieve the same problem :

DB function failed with error number 1054

```
Unknown column 'g.group_id' in 'on clause' SQL=SELECT a.*, a.name AS category, u.name AS editor, g.name AS  
groupname, h.name AS admingroup FROM jos_fb_categories AS a LEFT JOIN jos_users AS u ON u.id = a.checked_out  
LEFT JOIN jos_core_acl_aro_groups AS g ON g.group_id = a.pub_access LEFT JOIN jos_core_acl_aro_groups AS h  
ON h.group_id = a.admin_access GROUP BY a.id ORDER BY a.ordering, a.name
```

Please help me !!!:S

Got the same error on my 1.5 joomla installation. It's a clean installation without anny other modifications. Is there allready a solution, or is it best to look to some other forum software ?

DB function failed with error number 1054

```
Unknown column 'g.group_id' in 'on clause' SQL=SELECT a.*, a.name AS category, u.name AS editor, g.name AS  
groupname, h.name AS admingroup FROM jos_fb_categories AS a LEFT JOIN jos_users AS u ON u.id = a.checked_out  
LEFT JOIN jos_core_acl_aro_groups AS g ON g.group_id = a.pub_access LEFT JOIN jos_core_acl_aro_groups AS h  
ON h.group_id = a.admin_access GROUP BY a.id ORDER BY a.ordering, a.name
```

Hi,

I ran across this error, too. This is because there was a small schema change in the database around some of the access table--the column called "group\_id" in #\_\_core\_acl\_aro\_groups got changed to "id". So you can edit the offending database call in administrator/components/com\_fireboard/admin.fireboard.php.

It's at line 400, and you need to change two items: g.group\_id to g.id, and h.group\_id to h.id.

That fixes this admin error. I'm still having trouble, though, with line 437 in this file... apparently mosTreeRecurse() went away, or changed somehow--it's returning NULL which makes it so you can't administer forums and categories... haven't had a chance to track this issue down.

I've got to the line 437 error as well.  
Did you ever find a work around for this?

---

Yes. Somebody kindly posted an extensively fixed admin.fireboard.php file in this post:  
[http://www.bestofjoomla.com/component/option,com\\_fireboard/Itemid,38/func,view/id,7272/catid,65/#7269](http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,7272/catid,65/#7269) . This worked for me...

Ok thanks alot I did that and now I still see an error that says

Warning: array\_slice() : The first argument should be an array in (my directory) on line 443
