
table problems and community builder tab

Posted by k0s - 2007/04/20 21:57

hi there,

first: congrats for this really nice work! i waited long for something like this.

installation works great and i'm pretty happy that i could import the old topics of joomlaboard.

1. one big problem:

fireboard breaks my joomla template with some tags :(.

Its because line 2453 in /default/listcat.php i figured out...

if a user can see all categories this is no problem, but if there is something not accessible for him: the cat is not shown but the tags stay and breaks my existing table.

well i commented it out now and it works, but that's not the fine html way... would be nice if you can fix that somehow.

2. another problem with my table is:

if an user posts some large image the content row grows and the user information windows gets smaller and smaller.

in some cases i couldn't see anything of the user who posted the picture.

(well i think this is a general problem with my template but maybe the behavior can be fixed?)

3. at least:

is there any way how to rename the board options in the community builder profile editor?

`_UE_FB_TABDESC`

`_UE_FB_VIEWTYPE_TITLE:`

that doesn't look pretty nice and it is for sure not very userfriendly ;)

sorry for my bad english, i hope it was understandable ;)

This is the image of the last point you made

<http://img49.imageshack.us/img49/4603/cberrormg8.gif>

I too have the same problem with the last point.

FB support team are so helpful and extremely polite.. I hope we will get solution soon....

Re:table problems and community builder tab

Posted by Dragonfly - 2007/04/21 06:25

I found the solution, for the last one go to CB Field tab management and other settings.. you just need to replace those lines without underscores.

For the first two table issues, it's up to your website design. FB can be put inside a table as small as 540 pixel width without any problem..

Re:table problems and community builder tab

Posted by k0s - 2007/04/21 14:01

if you replace those strings, it doesn't work any longer.

Exactly, but those strings look ugly when I changed them to readable ones the orders whichever way I choose doesn't work, the oldest posts still stay top...

I went to CB default language file(under CB component plugin) and changed all `_SB_` (yours may be `_JB_`) to `_FB_` like some advised but still no use so far...

I hope someone will come across the same problem and solve the problem... we can benefit the same...

Yes there is a way to fix it. Please do not change any of the names, leave it or change it back to the default. If you do not remember, go to the admin tool for FB and go to the integration tab where you choose CB. Press on the link that says it will built the tabs for CB. Verify that it did indeed change them back. Assumeing it did, you now need to get you a file located on your server using an FTP or joomlaxplorer and nav to `/components/com_comprofiler/plugin/language/default_language/`.

You will be looking for a file called `default_language.php`. You need to edit it. Add the followin code after the section with the comment label

```
//added for SB 1.5 during 1.0 RC 1
```

```
Should look like this...
```

```
//SB Integration Support
```

```
DEFINE('_UE_SB_TABTITLE','Forum settings');
```

```
DEFINE('_UE_SB_TABDESC','These are your forum settings');
```

```
DEFINE('_UE_SB_VIEWTYPE_TITLE','Preferred viewtype');
```

```
DEFINE('_UE_SB_VIEWTYPE_FLAT','Flat');
```

```
DEFINE('_UE_SB_VIEWTYPE_THREADED','Threaded');
```

```
DEFINE('_UE_SB_ORDERING_TITLE','Preferred message ordering');
```

```
DEFINE('_UE_SB_ORDERING_OLDEST','Oldest post first');
```

```
DEFINE('_UE_SB_ORDERING_LATEST','Latest post first');
```

```
DEFINE('_UE_SB_SIGNATURE','Signature');
```

```
//added for SB 1.5 during 1.0 RC 1
```

```
DEFINE('_UE_SB_POSTSPERPAGE','Posts per page');
```

```
DEFINE('_UE_SB_USERTIMEOFFSET','Local time offset from server');
```

```
DEFINE('_UE_SB_CONFIRMUNSUBSCRIBEALL','Are you sure you want to unsubscribe from all your forum subscriptions ?');
```

```
DEFINE('_UE_FORUMDATE','Date');
```

```
DEFINE('_UE_FORUMCATEGORY','Category');
```

```
DEFINE('_UE_FORUMSUBJECT','Subject');
```

```
DEFINE('_UE_FORUMHITS','Hits');
```

```
DEFINE('_UE_FORUM_POSTS','Forum Posts');
```

```
DEFINE('_UE_FORUM_LASTPOSTS','Last %s Forum Posts');
```

```
DEFINE('_UE_FORUM_FOUNDPOSTS','Found %s Forum Posts');
```

```
DEFINE('_UE_FORUM_STATS','Forum Statistics');
```

```
if (!defined('_RANK_MODERATOR')) DEFINE('_RANK_MODERATOR','Moderator');
```

```
if (!defined('_RANK_ADMINISTRATOR')) DEFINE('_RANK_ADMINISTRATOR','Administrator');
```

```
DEFINE('_UE_SBNOTINSTALLED','Simpleboard forum component is not installed. Please contact your site administrator.');
```

```
DEFINE('_UE_NOFORUMPOSTS','This user has no forum posts.');
```

```
DEFINE("_UE_USERPARAMS","User Options"Â«Â»);
```

```
//FB Integration Support
```

```
DEFINE('_UE_FB_TABTITLE','Forum settings');
```

```
DEFINE('_UE_FB_TABDESC','These are your forum settings');
```

```
DEFINE('_UE_FB_VIEWTYPE_TITLE','Preferred viewtype');
DEFINE('_UE_FB_VIEWTYPE_FLAT','Flat');
DEFINE('_UE_FB_VIEWTYPE_THREADED','Threaded');
DEFINE('_UE_FB_ORDERING_TITLE','Preferred message ordering');
DEFINE('_UE_FB_ORDERING_OLDEST','Oldest post first');
DEFINE('_UE_FB_ORDERING_LATEST','Latest post first');
DEFINE('_UE_FB_SIGNATURE','Signature');
//added for FB 1.5 during 1.0 RC 1
DEFINE('_UE_FB_POSTSPERPAGE','Posts per page');
DEFINE('_UE_FB_USERTIMEOFFSET','Local time offset from server');
DEFINE('_UE_FB_CONFIRMUNSUBSCRIBEALL','Are you sure you want to unsubscribe from all your forum
subscriptions?');
DEFINE('_UE_FBNOTINSTALLED','Fireboard forum component is not installed. Please contact your site administrator. ');
//AboutMe
DEFINE('_UE_REALLY_EMPTY',' ');
//Mamblog search:
This should be around line 753. Once you save it/Upload it, go check CB, should be fixed.
And hey, give some Karma, please.;
```

Hi There,

This tip worked great for me, even though my default_language.php looked a little different.

I was wondering if it's possible to reduce the width of the signature box on the CB tab. It's so wide that it throws my template out of shape.

EDIT: Ok, found it on my own. It's in CB Field manager--> fbsignature

Thanks again for the great tips!!

You rock, man.

Thanks for that fix.

Since I've wasted my mind on the tip explained here before understanding, I post here the result of my brainstorming.

Int this file you will find :

- the corrected "defaut_language.php" file

and

- the corrected "french.php" file

in their respective folders paths

Thank you all... http://www.bestofjoomla.com/images/fbfiles/files/correctionCB_FBtabs.zip

The zipped file fixed this issue, and so I thank you for that. My question is why this is still happening? The actual fix was posted well over a year ago, then another nice person actually supplied the zip file of the php files needed. I just upgraded and these were not on the stable 1.04 version... Just curious.. as this is not the first time, I have seen hacks that work, that have not been put in the release...

Things that make you go Hmmmmmmmmmmmmm!!
