Posted by Adeptus - 2007/05/30 22:01

---

## Changelog

-----

### Legend:

- # -> it is corrected
- + -> it is added
- ^ -> it is changed
- -> it is removed
- ! -> the prevention

-----

## Version 1.7 - May, 30th, 2007

-----

- + users ban system. 2 variants of bans are possible: full ban and read-only mode.
- + ban system adjustment in Admin area: on/off, the ban list.
  
- + management of the permission to attach downloading for Visitors (on/off).
- + code parsing about the permission of downloading by Visitors.
  
- + full management of announcements.
- + Administrator has a link on management of announcements.
- + visual editor included in editing of announcements.
- + announcements "understand" HTML-tags.
- + support of simultaneous display of several announcements.
  
- + protection against a spam and boats - for input or editing of messages/themes need to enter a safety code.
- + protection against a spam and boats is included and at "prompt reply".
- + management of protection against a spam and boats from Admin area(on/off).
  
- + new positions of the modules are supported, all them became seven (fb\_1, fb\_2, fb\_msg\_1, fb\_msg\_2, fb\_msg\_b, fb\_msg\_t, fb\_bottom).
  
- + hide parts of the text from Visitors.
- + parsing new tag HIDE and the button for its automatic input in editors is included.
- + the choice of any text for substitution closed from Visitors is included.
  
- + the system of a conclusion of the information on editing of messages (who, when and why edited the message) is included.
  
- + earlier even at the disconnected avatars of avatars in a greeting all the same it was displayed. Now at the disconnected Avatars of avatars in a greeting too it is not displayed.
  
- + button added to line of search in a forum. As one my user - "for camels"... :laugh:
  
- + all new options in Admin area are united in a new bookmark with the modest name "Adeptus"... :lol:
  
- # fix a bug with repeated loading of pages at an input on a forum.
- # fix a bug leading in error-404 by pressing of the button "to mark all as read".
- # fix a bug with wrong display of Cyrillic symbols in the users signature.
- # fix a bug with incorrect display HTML in the users signatures.
- # fix a bug with display of double inverted commas.
- # fix a bug with incorrect display of Cyrillics in names of the attached files and pictures.
- # fix a bug leading not-display of smiles in a window of a preview of the message.
  
- ! Version 1.7 is not established by rerecording of files over the previous versions!
- ! For installation ver.1.7 remove the previous version in the regular way, preliminary
- Having kept catalogues /avatars and /uploads (avatars of users & attaches are stored in them)!
- ! Groups of users are created, but to appoint to their users while it is necessary manually!

Have a fun! :)

## User groups control for Fireboard RE

Posted by Adeptus - 2007/06/02 13:02

---

Today I publish the

User groups control system for Fireboard RE ver.1.7.

System possibilities:

- + any user can appoint any group,
- + current groups are displayed in the list of users,
- + the list of users can be sorted by groups,
- + names of groups can be any way changed,

Remark:

For display of groups in the list of users I used field earlier present there "Signature". I have made so not because to me laziness was to enter a new field that is why, that need of display of SIGNATURES of users in admin area is represented to me doubtful. And considering, that in Fireboard RE I have included permission HTML in signatures - and unsafe... Therefore I have cleaned a field "Signature", and instead of it there was a field "Group".

Restrictions:

- ! To change an accessory to groups of the Superadmin - it is impossible,
- ! Groups only eight and to change this quantity it is impossible (for compatibility with official assemblages of a forum from this site)

The system released as hack for installation over established current version Fireboard RE - 1.7 and as it will be included in archive of assemblage Fireboard RE 1.7.

Installation order:

unpack archive and copy files in corresponding places of the established forum over the existing.

Download possible on Adeptus Test Drive.

It is excellent! With pleasure I accept your offer.

However, if I at least understand English language a little, in Spanish I do not speak in general... ;)

---

Probably, you would agree as to rule section for Spanish-speaking users at my forum?
