## its possible to replace words with an ad?

Posted by zongas - 2007/07/17 17:12

---

Hi all,

I want to replace words with text links to sponsors.

Like replace words "shop coffee" with "sponsor\_link.com" and at the same time replace "milk shop" with "milk\_shop\_sponsor.com"

As i understand i cant do that with badwords.

Anyone could me guide to right direction? an alternative plugin, an hack, something else.

Thanks

=====

I'm also looking for something like that.

I used SMF before, and used the badword-thing in SMF to do this.
