
Fireboard 1.0.2 RC1 = what SVN Revision

Posted by kenmcd - 2007/07/28 18:42

.

It would be helpful to know what SVN revision number is this 1.0.2 RC1.

This way testers could easier determine if an issue had already been addressed in the current SVN.

.

.

The preparation for 1.0.2 RC1 is not noted in the SVN.

Let's guess that the 3:46 PM, Friday, July 27, 2007 (west coast USA, GMT -8 PST) is close.

That would be around Revision 229.

So make sure that your reported bugs are not already addressed in the SVN after Revision 229.
