
No. of Posts and All Forum Messages differs

Posted by LocaliceR - 2007/07/28 20:02

My following noticement might not be an 1.0.2 RC bug as I couldn't test it on a productive site. I saw it here on bestofjoomla.com when I clicked some user profiles that the number of posts displayed in the left column (where the avatar is visible) is greater than the number of posts in the paginated All Forum Messages of the same user.

These number should be equal, shouldn't they?
