
[SOLVED] Error to install

Posted by kask - 2007/07/29 10:21

Hello,

I try to install 1.0.2 RC1 Fireboard in an Joomla 1.0.12 installation. I have an error when i try to go to the forum in the frontend (no problem in the administration) :

Fatal error: Call to undefined function: jimport() in /homepages/ XXXXXXXXXX /components/com_fireboard/fireboard.php on line 138

This function jimport(), is it a converter function ?

More information for my installation :

- Joomla 1.0.12
- Community Builder (last version)
- SMF and joomlahacks bridge, the table of SMF is in the table of joomla with the prefix smf_
- hack JACL of Byostech

=====

I found this post with perhaps a solution... The bridge with SMF seem to be the problem
