## [Solved] foreach() errors (whoisonline/userlist)

Posted by Jeroen.php - 2007/07/30 14:24

---

Warning: Invalid argument supplied for foreach() in  
/home/docenton/public\_html/components/com\_fireboard/template/default/plugin/who/whoisonline.php on line 62

Warning: Invalid argument supplied for foreach() in  
/home/docenton/public\_html/components/com\_fireboard/template/default/plugin/who/whoisonline.php on line 82

This shows on the userlist also:

Warning: Invalid argument supplied for foreach() in  
/home/docenton/public\_html/components/com\_fireboard/template/default/plugin/userlist/userlist.php

foreach() problems are typically database related. It is caused when the SQL update hits an error and does not complete the rest of the update. Try uninstalling Fireboard and dropping all Fireboard fb\_ tables in PHPMyAdmin and reinstalling.

Check out this thread as well.

By deleting the remaining db tables and reinstalling it's solved.

Thanks! Jeroen
