
Fireboard 1.0.1p for both Mambo and Joomla!

Posted by radmehr - 2007/08/01 22:29

Mambolearn Team is proud to announce the release of Fireboard 1.0.1p Beta version.

This new release of Fireboard works on both Mambo and Joomla!. That's great for users who love using Fireboard Forum on Mambo. Hereby, we thank our developers at mambolearn team and the huge support from our friends bestofjoomla team.

The new features that you will see in this special version are as follow:

Compatible with Mambo
Compatible with Joomla!
Compatible with Solar calendar in persian mode
Persian Language included
Much better performance!
some bug fixes :)

...

You can download our special component and if you like it you are welcome to rate it and if you feel like giving a helping hand write a small comment on our site.

To download this special release, please visit our site at <http://www.fireboard.ir> and download it!
