
Template: Gated Community for 1.03 Stable

Posted by palebluedot - 2007/08/05 04:28

This is my first DARK template for Fireboard so I need some help testing. I call it Gated Community. It is for version 1.03 Stable. It should also work fine on 1.02 RC2. I have not tested it on any other version and do not support previous version installs.

You can easily change the link color by opening up "forum.css" and searching for "#ff6600" and replacing it with whatever color you wish.

Gated_Community_UNZIP_First.zip

When replying, please let me know your Joomla template name (and link if possible), What browser(s) you experienced the problem in and a screenshot or link if possible. Thanks!

Still looking for people to test this template out. Any feed back, even "it works fine" is appreciated.

I'll do that right now.

Edit. I've gone through the template pretty quickly and haven't found any bugs. It seems pretty solid. Not too fond of the gate graphics (a little on the large side) though but that's besides the point.

Thanks...graphics are, of course, not for everyone :). Does the look resemble the screen shots fairly well (other than Joomla template defined areas).

Re:Template: Gated Community for 1.02 (Testing Pha

Posted by grumblemarc - 2007/08/19 01:02

Absolutely accurate. It's a very solid template. Makes me want to finalize my UK Dark template with the pending stable release looming in the future.

Cool, thanks! And we need more template developers so glad to hear you're working on a template.

We are not modifying the CSS anymore, so you are free to do your templates based on the latest SVN code.

Re:Template: Gated Community for 1.02 (Testing Pha

Posted by palebluedot - 2007/09/01 22:13

thank you danialt. I'm in the process of revamping my main website and have taken on a new job as of recent, so I haven't had a lot of time to do fireboard related stuff. I will try to get some templates finalized and release soon tho. Thanks.

The template looks beautiful.. One of the nicest I've seen. I love the name of it too... Very funny and clever.

Love this template - edited to a Blue effect though :) Only one that has worked for me that I like now - I used the Dark Blue Image set with it - looks very nice. Many Thanks!

Re:Template: Gated Community for 1.03 Stable

Posted by WastedZombie - 2007/10/27 15:25

What am I doing wrong?

Whenever I switch to a non-default template O get this error:

pat-Error Could not load templates from header.html.

Any help is much appreciated.
