
Automatic \"PM inbox\" link in profile box

Posted by david4ie - 2007/08/12 03:25

Hello

I developed this for my website and thought I'd share it.

This fix places a link to what ever Pm system you are using in the profile box, like in the image below.

<http://www.bestofjoomla.com/images/fbfiles/images/profile-94b1c0adfc29032902a0891aa4399909.JPG>

To use this all you have to do is find

components/com_fireboard/template/default/plugin/profilebox/profilebox.php

and replace it with the file attached.

The code which makes this work is below

```
///Code for PM inbox link in profile box : By Dave E.//////////
switch ($fbConfig)
{
case jim : $pm_url = "index.php?option=com_jim"; break;
case pms : $pm_url = "index.php?option=com_mypms"; break;
case uddeim : $pm_url = "index.php?option=com_uddeim"; break;
case missus : $pm_url = "index.php?option=com_missus"; break;
case clexuspm : $pm_url = "index.php?option=com_clexus"; break;
case no : $pm_url = "";
}
////////// http://www.bestofjoomla.com/images/fbfiles/files/profilebox-426b2ec3e58fcb06f6000cb14f469ea6.zip
```

you should really try to add an Itemid to those URL's, because not adding them plays havoc with templates assigned to the site. not having an Itemid in the link reverts the template to the default and doesn't show the pathway correctly.

so is this working with any Forum template ?

Do i need to have clexus for that

?
