## example-print.css

Posted by hawkeye1103 - 2007/07/29 22:20

---

i am having a problem with fireboard i am missing the example-print.css from

File does not exist: ....components/com\_fireboard/template/default/plugin/recentposts/example-print.css

where can i find this file.....i've googled for it... but no luck ...not in the fireboard component install archive... please advice

I am having the same exact problem on 1.0.2RC2.

The problem is that this file:

components/com\_fireboard/template/default/plugin/recentposts/function.tabber.php

has that file (example-print.css) referenced in it in 2 places. example-print.css does not exist.
