
click on avatar goes to profile

Posted by mattpist - 2007/04/18 20:51

this was fixed in joomlaboard 1.1.5.2, but looks like it hasn't been implemented here.

it really makes more sense to me to let people click on the person's avatar to be taken to their cb profile rather than the obscure little 'guy' icon.

also, it would be great if fb could import the 'no image' icon from cb for people that haven't uploaded an image to their profile yet.

let me just say though... amazing job! thank you so much for creating this component, it looks and works fantastic!
