
Internet Explorer cannot display the webpage

Posted by mumbi - 2007/09/02 10:19

After successful install and create a first category, when I try to create another category or Forum, it receive a message that 'Internet Explorer cannot display the webpage'

My page is http://www.ukzambians.co.uk/index.php?option=com_fireboard&Itemid=11949

My advice to you, since your forum is relatively new, is to uninstall the version you have and use 1.0.2.

Refer to this thread.

grumblemarc,

We have this problem as well. I went to the thread that you referred (http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,17411/catid,65/). It says to install 1.0.3 Stable.

We have Fireboard 1.0.3 Stable and Joomla 1.0.13.

Is there anything else I can do to fix this problem?
