
Fireboard installation on Bestofjoomla.com

Posted by Redwood - 2007/09/03 18:10

I'm new to fireboard, but installed it today without a problem. Love it. It's better than simpleboard.

But got some questions.

- 1) Wich pms system are they using on this site (bestofjoomla) It's great.
- 2) Is community builder used on Bestofjoomla?
- 3) Are there any other mods/plugins on the Bestofjoomla Fireboard Install?

Thnx
