## searchphrase ending with Ö gives error

Posted by crisscross - 2007/09/04 19:06

---

The users on my site have discovered that a search in fireboard that ends with the swedish letter "ö" results in this error:

Warning: preg\_replace() : No ending delimiter '/' found in  
/home//www/components/com\_fireboard/sources/fb\_search.class.php on line 241

Warning: preg\_replace() : No ending delimiter '/' found in  
/home/www/components/com\_fireboard/sources/fb\_search.class.php on line 243

This is rpeated a couple of times. The same thing happens if the search phrase ends with "ä" or "å"

Fireboard SVN-305  
Site is joomla 1.0.13  
Language: swedish  
PHP 5.2.3

I can reproduce the same error!

Fireboard Component 1.0.3 Stable  
Joomla 1.0.13  
Language German  
PHP Version 4.4.7
