
Fireboard Configuration

Posted by guruwatch - 2007/09/05 01:01

Installed the board, works great, easy to install even for a noobie like me!

I want to use the forum as part of a membership site I have. My members will be the moderators, but the forum will be open to the public.

-is there a limit to the number of moderators I can have?

-can I set it so that only the moderators can have a link in their sig file, or even have a signature?

Thanks

JD
