## \$msg\_posts

Posted by saintswebbo - 2007/09/05 22:30

---

There seems to be a problem displaying this... when I select \$msg\_posts to be shown the line goes a long way causing the user profile section on the left to show scroll bars and the layout to mess up.

Anyone know what the problem is? I'm viewing in IE7

Hi saintswebbo,

this seems to be related to this:

[http://www.bestofjoomla.com/component/option,com\\_fireboard/func,view/Itemid,38/catid,66/id,19451/](http://www.bestofjoomla.com/component/option,com_fireboard/func,view/Itemid,38/catid,66/id,19451/)

You didn't posted however which version you are currently using, but posted in 1.0.0 forum. So I guess you are running 1.0.0, right?

Please be careful when editing the mentioned files as I fixed this for 1.0.2RC2. Backup your files before applying any fix.

Hopefully we will see a bug fix soon :)

HTH
