
Solved - Vistors/Guests Cannot Create Posts

Posted by sickboy007 - 2007/09/06 05:27

I want to allow unregistered visitors to post.

Fresh Install

Security section parameters are all set to NO.
Parent and child Categories and Forums are set for everybody.

No matter what I do it says administrator has disabled public write access.

Thanks

Don't know how I missed it. I kept going through that section. Must be late. Sorry.
