
Template Issue? *Solved*

Posted by clanspot - 2007/09/06 02:30

Great to see the new Component Released, been waiting all day anxiously.

So, I am working on a new install of Joomla 1.0.13, with Community Builder 1.1 and Groupjive 1.6 Beta2. Some of that information is irrelevant but I do have an issue.

I re-download Dorona Brown 1.0.1 Template assuming it would still work with 1.0.3 as it does. However when viewing the Frontpage of the Forum the default template is still present and then when navigating beyond there the Dorona appears.

Does anyone have this issue or maybe an admin/mod may have a suggestion?

Site: <http://www.gamersspace.net> ----- Still in Production!

I Have Resolved This Issue!
