
'Forum List' link problem

Posted by maff23uk - 2007/09/06 15:56

Hi,

I have JB 1.1.6-svn installed and there is a problem with the 'Forum List' link before and after the posts within a thread. There is the ltitle red 'x' as if it's trying to display an image/icon. As far as I know this should just be displaying a 'Forum List' text link.

http://joomla.ei-resource.org/index.php?option=com_joomlaboard&Itemid=6&func=showcat&catid=13

Anybody have any ideas?

Thanks.
