
Upgrading from 1.0.0 to 1.0.3/1.0.4 Issues

Posted by Dade - 2007/09/06 18:40

OMG! I'm not any god in MySQL, but isn't needed to understand that when SQL says

MySQL ha dicho:
#1061 - blablabla

anytime you try change from SQL queries or files, it's because it's a problem.

My file content (changed the prefix) is:

```
alter table `guaci_fb_attachments`  
add KEY `mesid` (`mesid`), COMMENT=";
```

```
alter table `guaci_fb_categories`  
add column `headerdesc` text NOT NULL after `description`,  
add column `class_sfx` varchar(20) NOT NULL after `headerdesc`,  
add column `id_last_msg` int(10) NOT NULL DEFAULT '0' after `class_sfx`,  
add column `numTopics` mediumint(8) NOT NULL DEFAULT '0' after `id_last_msg`,  
add column `numPosts` mediumint(8) NOT NULL DEFAULT '0' after `numTopics`,  
add column `time_last_msg` int(11) NULL after `numPosts`,  
drop key `catid`,  
drop key `catparent`,  
add KEY `msg_id` (`id_last_msg`),  
add KEY `parent` (`parent`),  
add PRIMARY KEY (`id`),  
add KEY `published_pubaccess_id` (`published`, `pub_access`, `id`), COMMENT=";
```

```
create table `guaci_fb_groups` (  
`id` int(4) NOT NULL auto_increment ,  
`title` varchar(255) NULL ,  
PRIMARY KEY (`id`)  
);
```

```
alter table `guaci_fb_messages`  
add column `modified_by` int(7) NULL after `moved`,  
add column `modified_time` int(11) NULL after `modified_by`,  
add column `modified_reason` tinytext NULL after `modified_time`,  
add KEY `hold_time` (`hold`, `time`),  
drop key `id`,  
add KEY `locked` (`locked`),  
add KEY `time` (`time`), COMMENT=";
```

```
alter table `guaci_fb_messages_text`  
drop key `mesid`,  
add PRIMARY KEY (`mesid`), COMMENT=";
```

```
alter table `guaci_fb_moderation`  
drop key `catid`, COMMENT=";
```

```
create table `guaci_fb_ranks` (  
`rank_id` mediumint(8) unsigned NOT NULL auto_increment ,  
`rank_title` varchar(255) NOT NULL ,  
`rank_min` mediumint(8) unsigned NOT NULL DEFAULT '0' ,  
`rank_special` tinyint(1) unsigned NOT NULL DEFAULT '0' ,  
`rank_image` varchar(255) NOT NULL ,  
PRIMARY KEY (`rank_id`)  
);
```

```
alter table `guaci_fb_users`  
add column `group_id` int(4) NULL DEFAULT '1' after `karma_time`,  
add column `uhits` int(11) NULL DEFAULT '0' after `group_id`,  
add column `personalText` tinytext NULL after `uhits`,
```

```
add column `gender` tinyint(4) NOT NULL DEFAULT '0' after `personalText`,
add column `birthdate` date NOT NULL DEFAULT '0000-00-00' after `gender`,
add column `location` varchar(50) NULL after `birthdate`,
add column `ICQ` varchar(50) NULL after `location`,
add column `AIM` varchar(50) NULL after `ICQ`,
add column `YIM` varchar(50) NULL after `AIM`,
add column `MSN` varchar(50) NULL after `YIM`,
add column `SKYPE` varchar(50) NULL after `MSN`,
add column `hideEmail` tinyint(1) NOT NULL DEFAULT '1' after `SKYPE`,
add column `showOnline` tinyint(1) NOT NULL DEFAULT '1' after `hideEmail`,
add column `rank` tinyint(4) NOT NULL DEFAULT '0' after `showOnline`,
add column `GTALK` varchar(50) NULL after `rank`,
add column `websiteurl` varchar(50) NULL after `GTALK`,
add column `websiteurl` varchar(50) NULL after `websiteurl`,
add KEY `group_id` (`group_id`), COMMENT=";
```

```
alter table `guaci_fb_whoisonline`
add KEY `userid` (`userid`), COMMENT=";
```

```
INSERT INTO `guaci_fb_groups` VALUES ('1', 'Registered User');
```

```
INSERT INTO `guaci_fb_ranks` (`rank_id`, `rank_title`, `rank_min`, `rank_special`, `rank_image`) VALUES
(1, 'Fresh Boarder', 0, 0, 'rank1.gif'),
(2, 'Junior Boarder', 20, 0, 'rank2.gif'),
(3, 'Senior Boarder', 40, 0, 'rank3.gif'),
(4, 'Expert Boarder', 80, 0, 'rank4.gif'),
(5, 'Gold Boarder', 160, 0, 'rank5.gif'),
(6, 'Platinum Boarder', 320, 0, 'rank6.gif'),
(7, 'Administrator', 0, 1, 'rankadmin.gif'),
(8, 'Moderator', 0, 1, 'rankmod.gif'),
(9, 'Spammer', 0, 1, 'rankspammer.gif');
```

```
UPDATE `guaci_fb_users` SET `rank`=8 WHERE `moderator`=1 AND `rank`=0;
```

What's wrong in there? I'm trying to do it manually but there are few things that I don't understand an can't change. Anyone can give me hand?

Thx for the attention, anyway I'm sure that 1.0.3 would be a nice release, take all care,
Dade

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by palebluedot - 2007/09/06 18:46

I have no idea what this means: MySQL ha dicho: #1061 - blablabla

Can you translate or ask in the language specific boards?

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by Dade - 2007/09/06 18:47

I've set blabla, meaning that whatever I say it all time get the same error.

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by palebluedot - 2007/09/06 18:50

Unfortunately I still don't know what "ha dicho" means and bla bla doesn't really provide any useful information in helping you. Sorry, hopefully someone else can help you better.

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by Dade - 2007/09/06 20:33

sorry, I've not understood you. Ha dicho, means "says"

Thx anyway for the attention

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by Dade - 2007/09/06 20:45

Ok, first error when upgrading:

Error

SQL query:

```
/* Alter table in Second database */ ALTER TABLE `guaci_fb_attachments` ADD KEY `mesid` ( `mesid` ),  
COMMENT = "";
```

MySQL says: Documentation
#1061 - Duplicate key name 'mesid'

=====

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by palebluedot - 2007/09/07 02:05

Duplicate key simply means the table already exists. You can safely ignore this error and execute the remaining statements since this structure already is the way it should be.

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by gunkaragoz - 2007/09/07 14:24

it says this error for me too. and i cannot continue on phpmyadmin?

Error

SQL query:

```
/* Alter table in Second database */ ALTER TABLE `jos_fb_attachments` ADD KEY `mesid` ( `mesid` ),  
COMMENT = "";
```

MySQL said: Documentation
#1061 - Duplicate key name 'mesid'

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by blowdoof - 2007/09/07 14:51

this probably means your current version was 1.0.1
Try the upgrade sql from 101 to 103 instead. It should work

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by gunkaragoz - 2007/09/08 10:34

yes sql is ok now but version on fireboard com. is 1.0.0 beta still?

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by danialt - 2007/09/09 13:19

did you read the installation manual at all?

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by grumblemarc - 2007/09/09 15:39

My guess would be "No".

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by kamon - 2007/09/11 20:44

Instead of running the entire script at once, try performing sql queries once at a time (copy & paste all the code until the first ';' and if you get the "duplicate things error" just ignore and move on to the next statement.

"Keep all commentary civil, and be courteous at all times. Constructive criticism is welcome, but insults directed towards other users or the site admins will not be tolerated. Coarse/insulting language will not be tolerated."

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by gunkaragoz - 2007/09/15 11:59

sorry for all these. i had just passed a step as it seen. now its 1.0.3 but still got a problem. in forum and admin back-end,

some parts have names like `_FB_EMOTICONS_EDIT_SMILIES` . is it about problem of mysql query? on php myadmin said succesfully completed but i have a suspicion on mysql part?

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by blowdoof - 2007/09/15 12:45

Please please read the beginners help...

You'll quickly find the answer in your language file ... just edit your english.php or whatever language you're using and use a search on the string... if not found, add it and give it a translation yourself

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by csousa - 2007/10/18 22:33

I also had a lot of problems upgrading my forum from 1.0.0 to 1.0.3 and solved the problem by using the 1.0.1 script like one of you said in the topic.

However, all my member are now Platinum adn when I try to quote someone, the code for the quote doesn't show... Stuff like " wrote" and is completely missing...

Can you please help?

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by drinkie - 2007/11/29 15:45

I have a copy of the installation manual on my hard disk.. I followed it EXACTLY as stated...

Let me point out a few things 1st..What has lead to so much confusion on people doing upgrades is the fact that if you installed before Fireboard 1.01 in admin it stated 1.00.

The installation instruction for upgrading only states to backup MySQL database.

It then states about updating Joomlaboard, but supposing you have already updated joomlaboard??

As I had done...

I followed the 3.2 upgrade from Fireboard 1.0.0

I have experienced all the errors that have been mentioned on this board, I spent the morning searching..I have run the Sql commands even though in the installation manual it mentioned nothing about that...

I have the error now about line 139. fb_pathway.php and have been trying to find the fix for this...

I only downloaded the update this morning, and the installation manual, This issue (or your post was Re:Upgrading from 1.0.0 to 1.0.3 Issues 2 Months, 3 Weeks ago)

and you post did you read the instruction manual...

Maybe if you had updated the manual it might have helped..

=====

Re:Upgrading from 1.0.0 to 1.0.3 Issues

Posted by grumblemarc - 2007/11/29 18:12

I didn't write the manual. Perhaps you can provide an updated one then?
