
[solved] upgrade from which version

Posted by GODComplex - 2007/09/06 20:24

Hi.

I have installed FB 1.01 Beta just a few days ago. I download the 1.01 beta zip and the installation was without any error messages.

But on the black Backend Fireboardlogo the Version Number was 1.0.0

So I'm not sure which upgrade Version i have to use.

I read in a few posts that some other users had the same version number problem.

Maybe one of them can tell me what to do.

Thanxx

How about reading the installation guide?

:S

ohhh sorry. it was sooo late last night:(

Please excuse me wasting your time. ;)

BTW Thanks to the Developer and all the others who are involved in that great project.:)
