Very nice work. I've been so bogged down in the support forums, I haven't had time to work on my templates. Glad you got one up and working, it looks great.

Thanks. When I get time I'm going to TRY and get some of the older 1.0.0 templates converted. Kimkin and Infinity were pretty cool.

BTW here's a screenie. <http://www.bestofjoomla.com/images/fbfiles/images/screenie1.jpg>

Great template, love the design and seems to work just fine with 1.0.3. Just one question, when a user tries to post a new thread, the "submit", "preview" and "cancel" text is not visible. Its not a huge issue, but was just wondering if there was an easy way to fix this so the text for these buttons will show up.

Again, awesome template!!! Is there anywhere to check for upgrades to this one?

Thanks!

-PB

Thanks. Look for "#fb_postmessage .button". It should currently be set to #666. Change it to suit. See if that works.

What upgrades are you looking for?

Wow thanks for the quick reply! That fixed it!!

I guess when i said upgrade i just mean like if there is anywhere i can check to see when you upgrade this fine template, like to a new FB version or anything like that. But its running just fine right now!

Thanks again!

i think the font that in red colour should be in white....huhuhu

Re:New! UK Dark template

Posted by grumblemarc - 2007/10/27 17:28

That's what CSS is for. This template was tailored for one site SPECIFICALLY.

Hi, has this been updated to work with fireboard 1.0.4? anyone know if it works with 1.0.4 without an update? Please let me know, love this theme!!

Re:New! UK Dark template

Posted by grumblemarc - 2008/01/15 14:32

It should. Haven't seen any issues.

Posted by rodvold - 2008/01/15 15:40

Do you have a demo link? :)

Re:New! UK Dark template

Posted by grumblemarc - 2008/01/15 17:54

Not anymore. The site that is was made for no longer exists.

so can anyone confirm if this skin works on the new fireboard 1.0.4??

Thanks!

Re:New! UK Dark template

Posted by grumblemarc - 2008/01/21 21:42

Anything template that works on .3 will work on .4. The template structure did not change.

Re:New! UK Dark template

Posted by grumblemarc - 2008/01/21 22:25

No problem. Glad you like the template. When I get some time maybe I can come up with a few more.

This template was working with 1.0.4 But after upgrading to 1.0.5 it doesn't work. Page is almost blank with a few title links.

Have anyone used this with 1.0.5?
