
Submit New Thread Text is White/White Background?

Posted by gdodge - 2007/09/08 01:05

I am using Fireboard 1.0 (default_gray template; dark_blue image set), Joomla 1.0.12 on my new Goju.com Test Website at <http://goju.amplex.net/> and am having the following problem . . .

When I go to enter a new thread the "text" entered into the box is white on white background How can I get to be black so my users can see wht they are typing? See attached image!

By the way the typed results appear in gray when I look at the post that was made!

How can I fix this and where?:unsure: http://www.bestofjoomla.com/images/fbfiles/images/Thread_Entry.png
