
New install - Deleting topic results in Errors

Posted by babylon - 2007/09/09 01:12

Hi,

It loks like there is a bug in the forum.
I have newest and did fresh install.

I created a topic with an image and at first i thought it was because of the image but it wasnt..
When you delete a topic i saw the follwing error....

```
UPDATE `jos_fb_categories` SET `time_last_msg`='1189088409',`id_last_msg`='1',`numTopics`='1',`numPosts`='0'  
WHERE `id`='1'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='1189088409',`id_last_msg`='1',`numTopics`='1',`numPosts`='0'  
WHERE `id`='2'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='0',`id_last_msg`='0',`numTopics`='0',`numPosts`='0' WHERE `id`='3'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='0',`id_last_msg`='0',`numTopics`='0',`numPosts`='0' WHERE `id`='4'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='0',`id_last_msg`='0',`numTopics`='4',`numPosts`='1' WHERE `id`='5'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='1189128728',`id_last_msg`='6',`numTopics`='4',`numPosts`='1'  
WHERE `id`='6'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='0',`id_last_msg`='0',`numTopics`='0',`numPosts`='0' WHERE `id`='7'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='1189123152',`id_last_msg`='5',`numTopics`='1',`numPosts`='0'  
WHERE `id`='8'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='1189123152',`id_last_msg`='5',`numTopics`='1',`numPosts`='0'  
WHERE `id`='9'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='0',`id_last_msg`='0',`numTopics`='0',`numPosts`='0' WHERE `id`='10'
```

```
UPDATE `jos_fb_categories` SET `time_last_msg`='0',`id_last_msg`='0',`numTopics`='0',`numPosts`='0' WHERE `id`='11'
```

An error occured during the delete(s). Please check the error below:
Could not delete the texts of the post(s). Update the database manually (mesid=7).

It says it couldnt delete the text of the posts,but infact it did deleted it...

Any solution to this..?

yes a reply would be great....
did it on a test site and was exactly the same....

Its just providing a verbose status of its actions.

=====

Re:New install - Deleting topic results in Errors

Posted by babylon - 2007/09/11 17:33

Huh...a verbose what ?

Sorry that were not all coders here but what does that mean in a way that we (us simple souls) can understand ?

thnaks :-) It did work

=====

Re:New install - Deleting topic results in Errors

Posted by ggouweloos - 2007/09/12 11:58

Not really solved.

It does not show the errors anymore, but this part of the error is still a bug:

Everything deleted, but failed to update user post stats!

Even after not showing the debug info the stats are not correctly updated. This might be the cause of the topic was written by a Guest and not a registered user!

=====

Re:New install - Deleting topic results in Errors

Posted by babylon - 2007/09/12 13:28

well for me it deleted the post and updated my posts..so if this only effects guests..i dont know..

Re:New install - Deleting topic results in Errors

Posted by Kremzeek - 2007/09/26 22:22

Its more than just the user stats. The number of topics and replies aren't updated. If you delete the last post in that section of the forum, the last post date is also set to 31/12/1969 16:00.

Re:New install - Deleting topic results in Errors

Posted by FredM - 2007/09/27 15:12

Hanging in here too.

The solution:

Go to class.fireboard.php Line 453
and delete
`echo($database->getQuery());`

did the job. But the post count is still there and not resetet.

Anyone?

sorry i have no idea...

when they added the russian guy into the team i hoped it would be better,faster etc..but nothing like that at all.

unfortunately were stuck with fireboard,as long as its the only realy integrated forum component.

as for the russian guy,i think they ordered him to hit the breaks cause he was fast...

do we notice that now?

nope...angry:

=====

Re:New install - Deleting topic results in Errors

Posted by orthanc - 2007/09/28 08:27

Try the "recount" option in the fireboard-config - that should fix the problem.

I thought I was nasty. Actually there are 4 other forum components for Joomla. One is strictly for 1.5 though. Might I suggest since you haven't been happy with FB since day one you would give one of these a try? And the "russian guy's" (screen)name is Adeptus. He is on version 1.9 of his FB offshoot. Since you're such a fan of his work you might prefer implementing that version.

Re:New install - Deleting topic results in Errors

Posted by babylon - 2007/09/28 13:29

thats not for you to say ,or do you wanna go downhill with your precious karma.. ?
nice to know that Adeptus is still busy with his version of the fireboard...
i thought he would put his energy into the normal fb version....
so he's working on 2 versions...
thats stupid...

=====

Re:New install - Deleting topic results in Errors

Posted by grumblemarc - 2007/09/28 13:41

I doubt he's working on this version anymore as there's nothing to indicate it. And the karma thing? No big deal either. Do what you want.
