
is there a way go back JoomlaBoard once upgraded

Posted by winson - 2007/09/04 05:43

Hi, as the subject, is there a way to undo the upgrade?
I am currently using JoomlaBoard, I know that it is very easy to switch to FireBoard,
but how easy will that be, if I would like to undo this change?
some instruction will be helpful.
thanks.

I guess winson is looking for some way to go back to joomlaBoard with the new posts made in fireboard "re-imported". I guess that would take a script that reverses everything done by the upgrade script.

That would be a bit difficult, as JB is depreciated and we won't put time to do the reverse script.
