Does the column exist? Were you previously on 1.0.1 prior to 0.2? It is possible some tables didn't get created back then.

I install the last versión, 1st setember. The archive ZIP said that is a 1.0.2.
I dont know if is a error.
I delete all component and try to install only the new version.
And it's all right...now, waiting to translate to spanish.
Thks.
