Completely Russified version of forum FireBoard ver.1.0.3 stable!
From www.freedom-ru.net and www.joomlao.com
Excellent component of a forum for Joomla!, it is recommended to all!!!

In the new version:

- * Unlimited subcategory system with better administration backend.
- * Faster system and better coding experience for 3rd parties.
- * The same
- * Profilebox at the top of the forum
- * Support for popular PM systems, such as ClexusPM and Uddeim
- * Basic plugin system (practical rather than perfect)
- * Language-defined icon system.
- * Sharing image system of other templates. So, choice between templates and image series is possible
- * You can add Joomla modules inside the forum template itself. Wanted to have banner inside your forum?
- * Favorite threads selection and management
- * Forum spotlights and highlights
- * Forum announcements and its panel
- * Latest messages (Tabbed)
- * Statistics at bottom
- * Who's online, on what page?
- * Category specific image system
- * Enhanced pathway
- * Joomla board import, SMF in plan to be released pretty soon
- * RSS, PDF output
- * Advanced search (under development)
- * Community builder and Clexus PM profile options
- * Avatar management : CB and Clexus PM options

change log:

- 1) A file of translation is changed, there are new added variables, the file from the version fireboard RE1.8. was assumed as a basis.
- 2) Component files class.fireboard.php, message.php, fb_bb.js.php, install.fireboard.php, admin.fireboard.html.php, bb_adm.js, fireboard.php were changed; icons of ranks were taken from the version fireboard RE1.8.
- 3) Buttons and icons of ranks in a templet default were changed. (They were taken from the version fireboard RE18 too)
- 4) Changes of the original version were made for localization only!

The original code was not changed!
