
[Solved] Parse errors all over

Posted by cosworth - 2007/09/12 12:41

Upgraded from 1.01 to 1.03 on test server - It worked fine.

I ftp'ed the working solution over to the live server and now I'm getting this:

Parse error: syntax error, unexpected '}' in
/home/trc/web/keld/administrator/components/com_fireboard/admin.fireboard.php on line 2544

And similar from the front end, so basically nothing works right now.

Any ideas?
