
JB Latest Module

Posted by 1808481 - 2007/04/23 17:10

Hi Guys,

I was using JBLatest Module to show my latest posts (cos the original modules are not as effective as this one). After upgrading to fireboard i was unable to convert the module for fireboard. Can any one help me about this.

You may find details of JBLatest as follows..

http://extensions.joomla.org/component/option,com_mtree/task,viewlink/link_id,375/Itemid,35/

Help please...

There still exists a "Latest Posts" Module for Fireboard. You can download it here.

Re:JB Latest Module

Posted by 1808481 - 2007/04/24 11:56

that's not the one i want... Because current module is not flexible and good looking as JBLatest.

Dos anyone have any idea??

ill do what i can..

=)

*a simple hack of JBlatest will do, i think.

Re:JB Latest Module

I would say that you need to change this condition

```
// Selectthe appropriate message board component
if ($board_type == 0)
    $componentname = 'com_fireboard';
else if ($board_type == 1)
    $componentname = 'com_mamboboard';
else
    $componentname = 'com_simpleboard';
```

And that you need to change the sql statements from `_sb_` to `_fb_` ...

I don't know if I missed anything...

Regards.

hi guys thanks for your replies.
rmanuelb--> i've tried that hack before i write here but unfortunately it did not work...

yeah !!

i am done!

will post to the extension site shortly.

=)

Okeh.. Done!

Download it here..

http://www.sayafuqaha.com/index.php?option=com_docman&task=cat_view&gid=21&Itemid=27

Based on the great JBLatest module by Rowan Seymour, rowanseymour@hotmail.com

This is merely a small edit of the popular module.

All credits goes to the original author, =)

hi fugaha, i dont know how but this caused an time out problem on my main page

you may see it on www.UniVertiGo.com

Re:JB Latest Module

Posted by fuqaha122 - 2007/04/24 22:01

hi.. can u redownload it?

i missed to edit the Cookie variable.. Thus, error will occur for any clean installation (those without previous JBoard db).

it shud be fixed now.

=)

Glad to hear that.

=)

dont thank me. Im just changing some small codes. thank the original JBLatest author for such a wonderful module - Rowan.

ofcourse i do.

but one more thing left i think. when i changed the parameter "Show from each thread" All posts to last posts same time out problem happened again??

I'll take a look into that.
How do you install FB at first? Is it via older JB database or a clean installation?

But then, I can't promise anything since I'm in the middle of an exam. =)

Re:JB Latest Module

I was an upgrade from JB. After that I run these queries for better performance as written at post http://www.bestofjoomla.com/index.php?option=com_fireboard&Itemid=38&func=view&id=2273&catid=2#2273

```
ALTER TABLE `jos_fb_categories` DROP INDEX `catid`, ADD PRIMARY KEY (`id` )
ALTER TABLE `jos_fb_categories` ADD INDEX `published_pubaccess_id` (`published`, `pub_access`, `id` )
ALTER TABLE `jos_fb_messages` DROP INDEX `id`
ALTER TABLE `jos_fb_messages` DROP INDEX `time_2`
ALTER TABLE `jos_fb_messages` ADD INDEX `hold_time` (`hold`, `time` )
ALTER TABLE `jos_fb_messages_text` DROP INDEX `mesid`, ADD PRIMARY KEY (`mesid` )
ALTER TABLE `jos_fb_moderation` DROP INDEX `catid`
```

I've had a look to queries in the module that shows latest posts but they seem OK to me anyway it's not working..

and wish you a good luck on exam ;)

Hey thanks for a cool module ... just wondering if there is anyway to get the users avatar syncing up with their latest post?

Thanks.
Locii
