
1.0.1 to 1.0.3: Upgrade was good EXCEPT for ...

Posted by jnovice001 - 2007/09/13 20:04

...Just did a 1.0.1 to 1.0.3 Upgrade.

All data is good was good EXCEPT for 2 things (one of which is easy):

1. Despite the fact that all the data is fine, the forum's homepage url/index.php?option=com_fireboard&Itemid=40 says that both "Topics" and "Replies" are ZERO. Which isn't true. The data is there and when you click on the categories and threads, they are clearly there...all readable...in tact...but the forum home says "0" for both Topics and Replies for some reason. Any ideas? on how to fix?

2. And this one is minor, but the avatars that the users had uploaded before have been replaced by the default FB avatar. Again, minor because they can just re-upload I assume, but it would be nice if you can tell me how to get them back...like I'm assuming that they are in my root/joomla/path SOMEWHERE...can I move them from their 1.0.1 location to the 1.0.3 location?

Thanks...

Um.

Ok.

Im a goofball.

Insert "RTFM" jokes here :) :) :)

"Recount Categories Stats"

:lol: :lol: :lol:

Moderator: Please close :)
