
Changes in SVN structure

Posted by danialt - 2007/09/14 14:15

Hey all Fireboard fans ;)

As of today Fireboard has a new SVN structure which is described as below:

<http://www.uploadgeek.com/uploads456/2/Clipboard01.jpg>

Current development will follow in two groups:

Trunk : Will have Fireboard 1.5 development

Releases/1.0 : Will maintain 1.0.x series

Hence, if you want to work on either groups, you should switch your current checked-out directories on your hard disks.

We are starting 1.5 series on the trunk, so you should not use trunk SVN for production sites.

Great..

Danialt change roadmap..

Thanks..

Trorram
