
[Solved] Itemid fixed in latestposts and statistic

Posted by viet4777 - 2007/09/15 15:59

When you are using a template for FB and other for Joomla, there is a problem with Itemid after you click a link in latestpost or statistics areas. The FB template will be changed to the default template for Joomla. This is because of missing of Itemid in the links.

There are small change in
components/com_fireboard/template/default/plugin/stats/frontstats.php
and
components/com_fireboard/template/default/plugin/recentposts/recentposts.php

The fixed files is in attachment.

Hi thanks for this. It works fine now.
But the same Problem is after answering a post. After Post successfull screen you automaticly send back to the thread.
There is the default template too.
Maybe you have an idea for this problem too.

I see the problem, It's because & amp; do not become &

I will give the fixed file later.

Thanks.

As I posted, the link in JB_LIVEURLREL contains & amp;;, it causes the problem.

OK, the problem is fixed as following:
In the file components/com_fireboard/template/default/post.php

find:
setTimeout("location='...
and change JB_LIVEURLREL into:
http://www.bestofjoomla.com/images/fbfiles/images/2007_09_22_235202.jpg

There are two changes in this file.

Hello

I'm not sure what to do.

My code atm looks...

```
(JB_LIVEURLREL.'&func=view&catid='.$catid.'&id='.$pid).'#.$pid;?>', 3500);
```

Re:[Solved] Itemid fixed in latestposts and statis

Posted by viet4777 - 2007/09/22 17:06

Find this code in the command begins with setTimeout only.

You are right.

anh change:

```
JB_LIVEURLREL
```

```
(str_replace( '& amp;', '&', JB_LIVEURLREL).'&func=view&catid='.$catid.'&id='.$pid).'#.$pid;?>', 3500);
```

Maybe the profilebox also has this problem, you can do as above.

Posted by GODComplex - 2007/09/22 17:50

Hmm ok

but now i have no automaticly back to thread function. it stuck in the post succesfull screen. and i have to click "back to post" by myself

<http://www.bestofjoomla.com/images/fbfiles/files/post-4ad42198da8f38a9057eaf69967a11c8.zip>

Let try my modification.

Re:[Solved] Itemid fixed in latestposts and statis

Posted by GODComplex - 2007/09/22 18:19

Perfect!!!

Thanks a lot!!!!

So i did something wrong with my edit^^

i have fixed all automatic redirects. anybody who doesn't want to change it by yourself can download my file. put the 4 files into it which contain automatic redirects.
the filestructure in the rar is the same fireboard uses.
so you can just extract it and upload the files into the com_fireboard folder.

my files are from fireboard 1.0.3 stable and nothing else edited.

Posted by drazhar - 2007/12/29 02:43

these changes should have been included in 1.0.4...
why are they not???

Because it is not in Tracker I believe. Give us a break. We fixed over 60+ together with some fundamental architectural changes to make FB secure. As I said in my other post, please help getting (solved) issues up on Tracker. That's the main list for devs.

Thx!

Re:[Solved] Itemid fixed in latestposts and statis

Posted by ffwd - 2007/12/31 08:56

i have tried the fix(post.php and myprofile.php) with no results, this is the link that redirect me after posting:

http://rcoffroad.cl/index.php?option=com_fireboard&Itemid=8&func=view&catid=14&id=14#14

It keeps redirecting me to the default theme.

I am kind of a newbie, but if i can help with something....just tell me.

Re:[Solved] Itemid fixed in latestposts and statis

Posted by drazhar - 2007/12/31 12:48

hi - i've checked if it is working (user: test) and it seems that you have not overwritten the files...

check again - if you can - see it on your own in file post.php if you have something like this:

```
setTimeout (blah blah blah (str_replace blah blabh blah(JB_LIVEURL)
```

or like this:

```
setTimeout (blah blabh blah(JB_LIVEURL)
```

the first one is what you need in ALL appearances of setTimeout for the links to work correctly.

PM me if you need assistance with that

Re:[Solved] Itemid fixed in latestposts and statis

Posted by ffwd - 2007/12/31 13:36

Thanks for looking the issue, but i did replace the files and now rechecked if it had the str_place...blah blah and yes it

does. i am using J1.5 RC4 and FB 1.0.4.

Could be the theme causing the problem?

=====

Re:[Solved] Itemid fixed in latestposts and statis

Posted by drazhar - 2007/12/31 14:24

nope. the theme has nothing to do with it.
it is the phpcode which creates the link. and it HAS to change & to &, but somehow it doesn't.
Did you check EVERY occurrence of SetTimeout function?

or you can send me the post.php file to incubi(at)poczta.fm

Re:[Solved] Itemid fixed in latestposts and statis

Posted by GODComplex - 2008/01/08 23:29

Hi

I'm still running 1.0.3 (everything is patched) so i want to wait with my update.
I have still a redirect to the default template, after clicking "mark forum as read" button.

Is there any solution??

=====

Re:[Solved] Itemid fixed in latestposts and statis

Posted by viet4777 - 2008/01/09 09:12

check components/com_fireboard/fireboard.php
at line 288, change JB_LIVEURLREL as the image below.

see the fix:
<http://img212.imageshack.us/img212/7568/20080109141027eb3.jpg>
