
Dark Red Template Revised!!!

Posted by grumblemarc - 2007/09/15 21:56

Based off of Dorona Brown. Tested on Fireboard 1.0.3. Any issues of bugs please report here.

thanks for the revised board. I needed it badly, as I read of the old red not being optimized for the new board version. I have just installed fireboard, and wanted this template badly, as it goes well with Daigonal, for Joomla. Just in time for me, thank you.

ok maybe i am wrong, but when i used the template demo, the dark red on there and this dark red weren't the same. this 1 appears to match the red_darkness. am i right? or totally off base? thanks!

Different from the template demo system. This one was based off of Dorona brown.

Not really. If I recall correctly that template was for the beta version of FB and was/is not compatible with the latest versions (.3/.4).
