
Community Builder integration

Posted by ralfakerkhoff - 2007/09/16 18:14

Hi,

after finding our, that the cb plugin works not very well , if have made some modifaction to my fireboard/cib integration:

1. Integration of the badwords2 filter

2. If you add a thread to your favourites and delete the favourite later, fb is always showing: favoured 0. After a modification described here in the forum, fb shows nothing if you have no favourites.

3. Integration of the cb icons described in this thread:

http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/catid,68/id,23054/#23054

After this mod, fb shows the settings (e.G. Birhtday, Gender, ICQ etc) made in Community Builder

4. User Profiles are always linked to Community Builder.

5. The link "My profile" in fireboard brings the logged in user to his profile page, where he can set his signature und the layout (e.G. threaded or flat view). All other fields are deleted. So the user does not have to complete to different profile settings.

6. If a guest visits the forum the links "register", "login" "lost password" are also linked to cb.

Note: This modifications work only with a installed Community builder. If you decide to delete CB, you have to reinstall Fireboard.

If somebody is interested, I can zip the changed files.

If you want to see how it works:

<http://www.pixelwonders.de>

Greetings

Ralf

18.09.07: Edited the cbplugin - it now schows only the lastest posts

20.09.07: Alkthough it may sound a bit strange: In FB configuration set the Community Builder integration to NO.

Avatar set to: Community Builder.

Profile set to: Fireboard.

The changed files could be downloaded here:

<http://www.pixelwonders.de>

You fill find them in the download section under XTRA Downloads.

Please note:

You use it at your own risk !!!!

Ralf

Posted by ralfakerkhoff - 2007/09/19 20:53

Just seen that couple of people have downloaded the mod from my site.

Please let me know if it works for you. I did not have any complications whith that on my site.

Ralf

Hi Ralf,

I did download it. So far it looks perfect and it seems to work perfect.
The only thing I am missing is:

-If I go to my CB Profile every information is there
-If I click my avatar in Fireboard, it links me to the CB profile (what is perfect!)

-If I click "My Profile" above in Fireboard, it gives me the FB Profile. Entries vom the CB Profile are missing there! I would prefer that this links me also to the CB Profile. I have all settings in the FB administration set to Community Builder and it still does not give me the CB profile there.

Thanks

Hi,

in FB configuration set the Community Builder integration to "NO".
It is right that "My profile" link points you to the FB Profile.
It's (at this time) the only point where you can setup your signature and layout.

=====

Re:Community Builder integration

Posted by FredM - 2007/09/20 22:14

Ralf,

thanks alot. Got me abit closer, but also not a solution.

Switching the settings to "No" will give me the CB User Profile out of the user menu.

If I click on Fireboard Profile within the forum I get all information, but in FB style (not in CB style, so it is not linked to CB).

If I click on an avatar picture now I am relinked to the start page of the website but no user profile. So this did not work either :(

If clicking on a avatar would not redirect me back to the website start page all would be fine.

=====

Re:Community Builder integration

Posted by ralfakerkhoff - 2007/09/21 08:20

Ups my mistake:

Set CB to the following:

Avatar: CB

Profile: FB

CB Integration : NO

Clicking the Avatar now points to the CB profile.

Sorry for this confusion.

BTW:

"If I click on Fireboard Profile within the forum I get all information, but in FB style (not in CB style, so it is not linked to CB."

You are right, this gives you the information in FB - This is because I did not find another way to integrate the signature, Favourites, Subscriptions into CB.

Ralf

All of this is very interesting, could you detail each modifications for 2, 4 and 5 since I did already number 3 and

remember the thread about number 6... or if the modified files are different than for number 3, can you tell us which files to change...
thanks

Re:Community Builder integration

Posted by ralfakerkhoff - 2007/10/02 09:45

Hi,

the changes for Number3 are exactly the same, which are described in the thread. I have made no other changes here.

Because my modification is the result of a night full of testing (trial and error) I did not have a documentation about the changes I have made.

To see what files are changed, you can download the modified files here:

http://pixelwonders.pi.ohost.de/Mambo/index.php/component?option=com_remository&Itemid,204/func,fileinfo/id,3015/

There are 12 changed files in it, including the changes for Number 3 and 6.

Greetings

Ralf

Maybe someone of the PHP pro's find an easier way to achieve the changes.

BTW: I have not noticed any problems with the modifications :-)

Ralf Okay im at your site.. where is this Mod you are saying.. can you be specific where to go in there?

Re:Community Builder integration

Posted by ralfakerkhoff - 2008/01/01 13:33

You would need either:

Fireboard mod, which contains only the changed files, or

Fireboard mod complete, which contains all fireboard files.

Note: As said in the file descriptions the mod is for fireboard 1.03.

Modifications for 1.04 will follow, when I have the time ...

Ralf

Re:Community Builder integration

Posted by ralfakerkhoff - 2008/01/01 20:34

Just uploaded the files for firebaord 1.04 to my site.

Features:

1. ready for badwords2
2. All profile changes/settings will be made in Community Builder
3. Community builder icons in Fireboard, you only need to create the files in Community Builder.

The zip contains a readme.txt with detailed instructions.

As always:

Usage is at your own risk. The modified files work without problems on my site, but I can't give a guarantee that they work with any Joomla installations.

You can find the download here at my site:

<http://www.pixelwonders.de>

Choose the downloads from the left menu bar and in the main download window, look at the bottom for the "XTRA Downloads".

Enjoy
Ralf

I don't know if I got it right... what do we need to do exactly?

Do we need the CB plug-in for Fireboard 2.0 beta at all? Their website is currently down so I can't download it... :(

Or is it necessary to install first the CB plug-in for Fireboard 2.0 beta and then extract your Fireboard 1.04 mod files on top?

Or should we install the plug-in, then extract both your Fireboard mod(for 1.0.3) and Fireboard 1.0.4 mod files one on top of the other?

I ask this because there are changes to the cb.fireboard.php in the 1.0.3 version but not in the 1.0.4 version of your mod.

What is the exact procedure? :unsure:

Re:Community Builder integration

Posted by 450Thumper - 2008/01/25 22:51

Is there a way to just point the "My Profile" links to

http://www.mysite.com/index.php?option=com_comprofiler&Itemid=29, which points to the users CB profile page?

Re:Community Builder integration

Posted by JerryLeeLewis - 2008/02/15 16:22

I just installed it

For German you need to add

```
DEFINE('_UE_USER_FAVS','Deine Favoriten');  
DEFINE('_UE_THREAD_UNFAV','Kein Favorit mehr');  
DEFINE('_UE_USER_NOFAV','Keine Favoriten');
```

in your Language file

But it wont work with child Boards

There not COuntin in my Profile LAst Posts

any Idea

Re:Community Builder integration

Posted by Tomek1 - 2008/05/24 00:38

For Joomla! 1.5 with CB just this in your cb.fireboard.php file which is located in:

{your joomla}\components\com_comprofiler\plugin\user\plug_cbfireboardplugin

Under defined('_VALID_MOS') or die('Direct Access to this location is not allowed.');
paste this code:

```
DEFINE('_UE_USER_FAVS', 'Deine Favoriten');  
DEFINE('_UE_THREAD_UNFAV', 'Kein Favorit mehr');  
DEFINE('_UE_USER_NOFAV', 'Keine Favoriten');  
DEFINE('_UE_USER_UNFAV_ALL', 'Zu den Forum Optionen wechseln');  
DEFINE('_UE_fb_CONFIRMUNFAVEALL', 'Wollen Sie zu den Forum Optionen wechseln?');
```

And it will show up the right names on the cb fireboard tab. I named _UE_USER_UNFAV_ALL like I named it because when I activate the checkbox for _UE_USER_UNFAV_ALL a message appears which is _UE_fb_CONFIRMUNFAVEALL so I named it what it does on my setup, after clicking okay it redirects me to the users fireboard profile.

Hope this helped and check what _UE_USER_UNFAV_ALL is doing on your system with _UE_fb_CONFIRMUNFAVEALL.
