## Last post when Moderated still shows up

Posted by djclinton - 2007/09/17 02:21

---

Hey all,

On the main page of the forum, the last post shows up even if the forum is moderated. So unapproved messages show up there with a link. If you click on the link it does say invalid post.

In the previous version it worked well and only displayed the last post that had been approved by moderators.

I think it lays in the layout.php in the template/default directory (we are using the default\_grey template) as the query there DOES say and hold='0' but it still shows the last post even if the hold='1' in the database.

It's an interesting problem.

Clinton

Hi folks,  
I have the same problem.

(installed fresh version of FireBoard and upgraded posts from joomlaboard, using default template)

Doesn anybody have any hints on this?

I have the same problem too,

The error has also been reported by myself and others in this post too.

I am using Fireboard 1.0.3 Stable on Joomla! 1.0.13 Stable.

Hi there,

I've found the solution and posted it here:-

[http://www.bestofjoomla.com/component/option,com\\_fireboard/func,view/Itemid,38/catid,77/id,27033/](http://www.bestofjoomla.com/component/option,com_fireboard/func,view/Itemid,38/catid,77/id,27033/)

Cheers

Clinton
