
preview: FB-POLL Prototype

Posted by iosoft - 2007/05/16 13:31

Could you pls tell me whether you have started working on the POLL feature for FB ?
If YES, then good, else I will dirty my hand :P

Re:asking the DEVELOPER about POLL ?

Posted by iosoft - 2007/05/17 07:29

Hi

I have started the work to integrate Joomla POLL with FB, but in such a manner that FB-POLL will not come at the Frontpage POLL and vis-versa.

I need a PHP Developer's support.

Objective is simple, he/she have to design a form to add POLL information to the Joomla Poll Database but from the frontend-PHP (just like adding poll data from the backend)

Please, help me out on this, it will reduce my work to 50%.

Waiting for your PHP file.

Thank you.

The 1st POLL prototype -

http://gigahertz.byethost18.com/index.php?option=com_fireboard&Itemid=102&func=view&id=1&catid=2

Have a look.

Still 1000s of things to do.

Need a help of a basic PHP-MySQL developer.

Dear dragontje124 and cyberpunk,

Thank you very very much for your kind helping hand.

Actually, I stacked due to 2 reasons - 1. My up-comming certification exam and 2. FB is/may change the core file structure, so waiting for 1st stable release.

For the same reason, I paused the FB+OpenSEF project.

If you can, here is a very very very small project todo -

(if you complete this, then half of my project will be done, and from other side I have completed almost 40%, 10% work needed as integration)

Make a simple PHP-MySQL form like this -

<http://img181.imageshack.us/img181/8789/pollsystemne1.jpg>

The data will be added to the Joomla Table: `_polls` and `_poll_data`

Also, another thing -

say, this php files name is `edit_poll.php`

if it is called as -

`edit_poll.php`

or

`edit_poll.php?id=0`

then, it will load with empty form

else if it is called as -

`edit_poll.php?id=1` (a `poll_id` from the poll table)

it will load-up the dates as default values in the form's text boxes.

(this is needed when one/mod wants to edit the poll)

It will be a great help if you assist me.

does it needs style or just a plain form?

I'm not sure i follow you on the date as default value bit.

You want the default value for all the poll options 1 - 12 to be the current server date value?

why not store that once and just call it in a hidden form element?

I'm asking questions cuase i'm trying to complete the form today I really wanna see fireboard on the level of smf then vbulletin and remain free.

No no no, thats a TYPO :P
Its just 'data', by mistake I typed 'date' :S

Initially, I want to keep it simple.
After that we can make it more advance..... with suggestions from all of you.

Thanks for helping.

I might find the time to make such a form in the comming day's.
Don't expect any miracles though, I'm relatively new to both php and sql, but up till now I've managed to work everything

out, so I'm up for a new challenge.

I'd say: get to your coding, and I'll try and fix you up with your form.

Before you start, send me a PM with your email.

I have a framework of the form ready, it just need some basic validation using JavaScript and very very basic php-mysql coding. No need to know about Joomla coding.....:kiss:

URGENT Small QUERY

I need a help in PHP-coding on Fireboard. I am modifying the Editor php file.

When I am in the Editor Window of Fireboard, how to know, what the editor is for -
To create new thread ? (I need it)

-or-

To Reply a post ?

-or-

To Edit a post ?

-or-

To Reply-with-Quote a post ?
