
PHP Fusion Converter?

Posted by M.Vargo - 2007/09/21 13:36

Hello everyone! I wonder if there is a PHP Fusion converter?

NO BUMPING THREADS PLEASE.

If I'm not mistaken, PHP Fusion is a fully contained CMS that happens to include it's own forum. It's similar in function to E107. If you're asking for a way to convert just the forum then that request belongs here. If you're asking to convert the WHOLE CMS then you might want to seek aid at the Joomla.org forums.
