Hello everybody,

I have [www.singy.net](http://www.singy.net) a new student community and i hae installed Joomla+FB :)

I dislike this feature in my forum

Post is followed with post...?! How?

I think I got it, with some options @ my FB Admin configuration, but I was wrong...

Flat or Threaded are the same. Nothing changes??!

I hope that the pictures are helpfull!?

Greetings from Serbia

Hi!

Each user can choose his/her preferred view by hitting the Threaded View /Flat View Button in the top (Where My Profile Help ... is)

You can change this when you are a thread.
