
Captcha Images

Posted by bobhardyoyo - 2007/10/02 14:30

How do I get captcha images to display? At the moment they appears as if the image can't be found but the random image.php file is there.

This is running on Joomla 1.03
Windows 2000 IIS
latest versions of PHP and MySQL
latest stable version of fireboard

Any help would be appreciated.
