
SQL question

Posted by Marshall - 2007/09/06 04:36

sorry just a SQL question before i execute the Fireboard_102_to_1.0.3.Stable.sql
in phpmyadmin do i select all the tables before i execute ? or i just select the jos_fb_ ones?
sorry i just donno much about that

ops no now i get this error

Error

SQL query:

```
/* Alter table in Second database */ ALTER TABLE `jos_fb_categories` CHANGE `moderated` `moderated` tinyint( 4 )  
NOT NULL DEFAULT '0' AFTER `alert_admin` ,  
ADD COLUMN `headerdesc` text NOT NULL AFTER `description` ,  
ADD COLUMN `class_sfx` varchar( 20 ) NOT NULL AFTER `headerdesc` ,  
CHANGE `id_last_msg` `id_last_msg` int( 10 ) NOT NULL DEFAULT '0' AFTER `class_sfx` ,  
COMMENT = ";
```

MySQL said: Documentation
#1054 - Unknown column 'id_last_msg' in 'jos_fb_categories'

=====

Re:SQL question

oh god :/

well thank you man anyways u did good but now sadly i have to wait for someone to help me means more offline time for me forum :(

Re:SQL question

Posted by Marshall - 2007/09/06 05:48

hmmm i didnt find many tables in the jos_fe_categoris so i used the Fireboard_101_to_1.0.3.Stable.sql & it worked "Your SQL query has been executed successfully"
so strange i am sure i had the 1.0.2 version not 1.0.1 but now anyways i dont see anytopics in my categories but i still have the same stats so the categories are there but not shown :/

Re:SQL question

I'm upgrading from 1.0.0 and have a question. In the description it says. Open "Upgrades/Fireboard_100_to_1.0.3.Stable.sql" file
Thats ok...but now to the stupid question. What shall i do with the file?? Whats the next step?

Am i going to load it somewhere or...???

Re:SQL question

after that u need to open ur phpmyadmin & click on SQL then execute the upgrade file (paste it in the input area) & click Go..

Re:SQL question

Posted by amnion - 2007/10/03 19:18

I'm getting the same SQL error for my first query:

#1054 - Unknown column 'id_last_msg' in 'jos_fb_categories'

My second query I get this:

#1054 - Unknown column 'birthdate' in 'jos_fb_users'

Did anyone ever figure this out?

DISREGARD--I am trying to run the 1.0.2 patch instead of the 1.0.0
