
Birthday icon shown for posts by non registered

Posted by rickert - 2007/10/04 21:55

Not a big issue but still: next to a post from a visitor (= non registerd user) the birthday icon (a cake) is shown even if the value for birthday is blank.

I'm looking also for a solution.

Just now I have uncommented the following lines in view.php:

```
if ($userinfo->birthdate !='0001-01-01' AND $userinfo->birthdate !='0000-00-00') {  
    $msg_birthdate = $fbicons ? 'birthdate.'" title="._FB_MYPROFILE_BIRTHDATE.': '$userinfo->birthdate.'" />' : '  
'._FB_MYPROFILE_BIRTHDATE.': '$userinfo->birthdate.';  
}
```

Unfortunately the icon will also no more been shown for registered users if they have filled in their birthdate.

WOW. Old posting, but I see that this is still an issue. Without commenting out the above code, do we know why this occurs for guest members?
