## acute accent and others cut of message

Posted by dedoo - 2007/09/26 10:56

---

Hi all,

I got this problem and after searching this forum I decided to ask the question.

I'm dutch and in our language we often use the acute accent on letters like é or ë but when I use this the message breaks off right after this letter.

I see it works on this forum so there must be some sort of fix or something I can change or remove in the code?

Thanks for helping me out...
