
Ghost problems

Posted by vipyammer - 2007/10/10 10:33

Hi,

We have migrated Joomla! to FB 1.0.3 (Import succesfull). After that we have applied the needed 1.0.3 fix and also no problems.

But when we as admins want answering / opening / changing some topic's other topics are showing so not the original one! Or when opening a topic a question occur with the question if you want to delete this topic? And sometimes when opening a topic for viewing these will appear into the edit mode?

We have running FB on Link: pspnieuws

Do we have some ghosts?

Greetings,
Vipyammer
The Netherlands

I thought I replied to tis. What is "the needed 1.0.3 fix"? If you upgraded from JB there aren't any fixes to apply. Perhaps that is your issue.
