
Thread Ordering

Posted by Unknown - 2007/10/15 05:38

Hi everyone,

I've been reading around, and found people who manage to solve this problem, but they don't say how. I want to order my threads oldest first.

I have the latest CB+fireboard plug fresh install. Everything is well integrated with no problems. One more thing, even the users from the modify profile, can't change the order or the view type.

Any one can help please?
