## Expand my board?

Posted by LifeOnWax - 2007/10/16 02:37

---

I remember when I first installed Fireboard, it gave me an option to show Fireboard WITHIN my site, or as its own page. Me, not thinking, and still in the coding phase, chose within, instead of its own page.

Is there any way to change that option?

I think that's a Joomla menu option. Not a Fireboard one.

Hmm... Any clue how that operates? I'm still a bit of a Joomla n00b, so to speak.
