## MDPro to Joomla

Posted by jag7720 - 2007/10/14 22:51

---

I saw a thread

[http://www.bestofjoomla.com/component/option,com\\_fireboard/Itemid,38/func,view/id,16449/catid,6/](http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,16449/catid,6/)

about gn\_ConvertMDPro.zip and it had a link to the file.

When I click on that link I get a 404 error.

Is this converter still available? If so, where can I get the file?

Thanks

Jason

Is it possible to change the registration requirements to add additional fields such as Name and address and phone

That's a different subject entirely. No options for that exist without some hacking.

Thanks. Can you help with these scripts?

I ran them and the everything went in as planned but I can only see the storied from the front page.

When I go into the admin area I an only see about 5 stories. I know the stories are there cause I can see them numbered in the categories and I can see them in the database.

I thought it might be the created\_by ID so I set them all to the Admins ID.

It is like the data is in the database but Joomla doesn't know about it

Do you know why they might not be showing up in the content area?
