
" _EDIT_TITLE" instead of "Edit Your Details"

Posted by Testest - 2007/10/21 16:41

Hi,

I just installed FireBoard 1.0.3 on Joomla 1.5. Everything seems to work fine, except that it says _EDIT_TITLE instead of Edit Your Details in the profile. If I click the link, the texts say _YOUR_NAME, _EMAIL, _PASS and _VPASS instead of the normal text. All other texts seems fine. I've done a clean install, same thing.

Any suggestions?

I had this. These entries appear to be missing from the language file. Just go to the file and add some (follow the style of others in the file as an example).

Re:" _EDIT_TITLE" instead of "Edit

I tried this fix... didn't work for me. There is more than one Language file, which one is it? Still showing the _EDIT_TITLE in the profile... Can anybody help with this?

What did you do that did not work?

Also running this on 1.5 right now is not wise. It does not "behave" the way it should even in legacy mode. That and the support for it right now is very limited.

I tried adding the following code to the ../administrator/components/com_fireboard/language/english.php

```
DEFINE('_EDIT_DETAILS', 'Edit Your Details');
DEFINE('_YOUR_NAME', 'Your Name');
DEFINE('_EMAIL', 'Email Address');
DEFINE('_PASS', 'Password');
DEFINE('_VPASS', 'Verify Password');
```

I'm a complete hack who knows very little about what he's doing. Did I do the right thing?

Re:" _EDIT_TITLE" instead of "Edit Your Details"

OK, actually this DID work... I just typed the wrong name. I shouldn't have put DEFINE('_EDIT_DETAILS', 'Edit Your Details'); - Instead I should have put DEFINE('_EDIT_TITLE', 'Edit Your Details');

So... this is a good fix after all :dry:

Thanks colfetski, worked like a charm!

grumblemarc: Any idea when a working version will be released, I have some other problems too, but can wait with asking about them until I try the new one.

hi! i have also a similar problem. but it's the `_FB_DT_DATETIME_FMT` and `_WHO_ONLINE_GUEST` instead of the actual date/time and name of user or guest (not logged in) respectively.

any clue?

Hola,

This edit works fine also in fresh installation of Joomla 1.5.1 and Fireboard 1.0.4.
Just to let others know :laugh:

Where do you find this on 1.0.4? I can't seem to find the file...

Thank you!

kRem
