
SOLVED: random code output when viewing thread?

Posted by DarkNSF - 2007/10/23 04:33

SOLVED: PHP Short Tag in MathGuard.php and MathGuard2.php from MXComment Component.

So this is what I get when viewing a thread on my freshly installed fireboard forum.

Link:
http://nsf.planetunreal.gamespy.com/index.php?option=com_fireboard&Itemid=2&func=view&id=1&catid=13

I'm not sure exactly how to fix this, but I am going to just try to copy all of the files over manually and see what happens. I searched the boards but couldn't find any similar problems, so if anyone could help I would appreciate it. ;)

```
0); return $output; } /** function that renders a final 3x5 matrix consisting of random characters * @param $a random
number a that renders to the 3x5 matrix consisting of random characters * @param $b random number b that renders to
the 3x5 matrix consisting of random characters */ function renderExpression($a, $b) { $output2 = ""; $number = array (
array ( 7, 5, 5, 5, 7 ), array ( 2, 6, 2, 2, 7 ), array ( 7, 1, 7, 4, 7 ), array ( 7, 1, 7, 1, 7 ), array ( 4, 5, 7, 1, 1 ), array ( 7, 4, 7,
1, 7 ), array ( 7, 4, 7, 5, 7 ), array ( 7, 1, 1, 1, 1 ), array ( 7, 5, 7, 5, 7 ), array ( 7, 5, 7, 1, 7 )); $plus = array ( 0, 2, 7, 2, 0 );
$eq = array ( 0, 7, 0, 7, 0 ); for ($line = 0; $line
```

this actually appears to be happening in joomla aswell, as my front page has the same problem :(

Posted by grumblemarc - 2007/10/23 16:11

Looks like something is in debug mode.

Re:random code output when viewing thread?

Posted by DarkNSF - 2007/10/23 16:24

I don't know, doesn't look like anything useful.

Debug mode is disabled in Joomla Configuration. Not sure what to do.

What is Mathguard? Are you running an anti-spam Joomla plugin?

Re:random code output when viewing thread?

Posted by DarkNSF - 2007/10/24 02:13

no, only components that are installed is mxc (commenting), and fireboard.

Do you think it could be gamespy's server?

Possibly since you're having this issue with Joomla as well.

Posted by grumblemarc - 2007/10/24 11:44

This definitely is NOT a FB issue.

Sorry about this mispost then, only noticed it in fireboard until i published content in joomla.

Thanks for your help guys :lol:

I got the same thing, I read the entire post string and don't see the solution? How do I stop this. I get crazy code out put after a fresh install of Fireboard and doing a test post. When I click the response to the test post, I get a crazy looking gigantic list of string code.

- A. Debug is off.
- B. Running Fireboard lastest
- C. Running Joomla 1.03.0

Can you help

Has nothing to do with FB. It was gamespy's server.

Re:random code output when viewing thread?

Posted by DarkNSF - 2007/10/26 00:02

I figured it out. (for my situation atleast)

It's due to a PHP short tag. Do you have the MXComment installed? If you don't search in your source in any MathGuard.php files.

Lookup PHP short tag, I can't seem to post it at all in here.

Cool. Could you mark this one as solved? Thanks.
